

Advanced Table Format Cell

This macro provides options to enhance your table cell format.

- **Background Color** - either Color name or Color hex code
- **Date format** - Find and convert MM/dd/yyyy to the selected format.
- **Format As Currency** - Valid value is `true` or `false`. If `true`, convert the number to currency format.

The screenshot shows a Confluence page with a sidebar on the left and a main content area. The main content area is titled "Advanced Table Formatting for Confluence" and contains two table examples. The first table, "Without macro", shows a table with columns: Name, Email, Address, and Date of birth. The second table, "With macro", shows a table with columns: Name, Email, Address, Date of birth, and Salary. The "With macro" table has a red background color applied to the "Name" cell for "Keith" and a date format applied to the "Date of birth" cell for "Keith".

Without macro

Name	Email	Address	Date of birth
Keith	k.abott@releaseteam.com	Home	30 Aug 1990
John	j.doe@releaseteam.com	Chicago	05/17/1991

With macro

Cell-level format applied to Keith

Name	Email	Address	Date of birth	Salary
Keith - background color	k.abott@releaseteam.com	Home	Thu, Aug 30, 1990 - date format	\$10,000.00 - currency format
John	j.doe@releaseteam.com	Chicago	05/17/1991	10000
Bob	b.james@releaseteam.com	Texas	04/25/1992	10000
